

THANUJA M

Associate Full Stack Developer

thanujamallakuntaa@gmail.com — +91-7032092533 — India

Objective

Associate Full Stack Developer with 1 year of professional experience in building scalable, secure, and SEO-optimized web applications using Next.js, React.js, TypeScript, Node.js, NestJS, and MongoDB. Strong experience in building multi-panel platforms, admin dashboards, and content-driven systems with real-world production impact.

Education

B.Tech (CSE)	RGUKT RK Valley	2024
Intermediate	RGUKT RK Valley	2020
SSC	ZPHS Paipalle	2018

Work Experience

Associate Full Stack Developer 1.5 Years

- Developed and maintained production-grade web applications using Next.js, React.js, Node.js, and NestJS.
- Built RESTful APIs, implemented JWT-based authentication, and role-based access control.
- Integrated payment gateways, ERP systems, dashboards, and CMS platforms.
- Focused on performance optimization, SEO, responsive design, and clean architecture.

Technical Skills

- **Frontend:** Next.js, React.js, TypeScript, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, NestJS, Express.js
- **Database:** MongoDB, Mongoose
- **Auth & Security:** JWT, Role-Based Access Control
- **Tools:** Git, Razorpay, Odoo ERP, AWS S3, REST APIs

Professional Projects

1. Kind India Donation Platform (kindindia.in)

Role: Full Stack Developer

Platform Overview: A large-scale nonprofit platform connecting donors, NGOs, and volunteers with three independent web panels — Frontend, Admin Panel, and NGO Panel.

Admin Panel:

- Developed a comprehensive admin dashboard using Next.js 14 and TypeScript.
- Built real-time analytics and reports for NGOs, donors, campaigns, donations, and payouts using ApexCharts and Recharts.
- Implemented user management workflows including NGO verification, document validation (PAN, 80G, FCRA, DARPAN), approvals, and status tracking.
- Developed CMS modules for blogs, banners, FAQs, testimonials, and legal pages.
- Implemented financial modules for commission management, payout tracking, and transaction history.

- Integrated role-based access control, real-time notifications, data export (CSV/Excel), and advanced filtering.

Frontend Panel:

- Enhanced UI/UX and mobile responsiveness using Tailwind CSS and React Hooks.
- Implemented donation flow improvements including bulk donation auto-distribution and removal of unnecessary limits.
- Added analytics-friendly element IDs and optimized mobile donation experience.
- Implemented inactive NGO filtering with 404 redirection for data integrity.

NGO Panel:

- Built a full NGO management dashboard with campaign CRUD, donation tracking, and payout management.
- Implemented volunteer management, request-take-care modules, and organization profile completion tracking.
- Designed modular layouts, reusable components, and data-heavy tables with sorting, pagination, and filtering.

Tech Stack: Next.js, TypeScript, React, Tailwind CSS, Material-UI, JWT, REST APIs, Apex-Charts, MongoDB

2. Artist Web Application (Artist Portal)

Role: Frontend Developer

- Developed a web-based artist dashboard to manage music albums and songs.
- Implemented login using existing mobile credentials with redirection to Play Store for onboarding.
- Built album and song management including bulk uploads, status tracking, and deletion.
- Ensured seamless integration with existing mobile app and admin approval workflows.

Tech Stack: Next.js, TypeScript, REST APIs

3. KBS Corporate Website (leoion.com)

Role: Frontend Developer

- Developed a responsive corporate website using Next.js and TypeScript.
- Implemented SEO-optimized pages, reusable components, and mobile-first layouts.
- Ensured fast performance, accessibility, and cross-browser compatibility.

Tech Stack: Next.js, TypeScript, Tailwind CSS

4. Vaishnai Group Corporate Website (vaishnaoigroup.com)

Role: Full Stack Developer

- Built a multi-business corporate website with dynamic content and CMS features.
- Developed backend APIs, authentication, and admin content controls.
- Implemented secure file uploads and automated email notifications.

Tech Stack: Next.js, NestJS, MongoDB, JWT, AWS S3

5. MirakiTech Corporate Website (mirakitech.com)

Role: Full Stack Developer

- Designed and developed a modern corporate website using Next.js and Node.js.
- Implemented responsive UI, SEO best practices, and optimized performance.

- Built backend services for contact forms and dynamic content handling.

Tech Stack: Next.js, Node.js, JavaScript, Tailwind CSS

Academic Projects

- **Hospital Management System:** Java and Spring Boot for patient, doctor, and appointment management.
- **Online Book Store:** Web-based product catalog, shopping cart, and checkout functionality.

Achievements

- Delivered multiple production-ready applications within 1 year.
- Completed “Web Technologies” course certification.
