Objective

Associate Full Stack Developer with 1.5 years of professional experience in building scalable, secure, and SEO-optimized web applications using Next.js, React.js, TypeScript, Node.js, NestJS, and MongoDB. Experienced in building multi-panel platforms, admin dashboards, and content-driven systems with strong focus on performance, clean architecture, and production reliability.

Education

B.Tech (Computer Science and Engineering)	RGUKT RK Valley	2024
Intermediate	RGUKT RK Valley	2020
SSC	ZPHS Paipalle	2018

Work Experience

Associate Full Stack Developer — Miraki Technologies 1.5 Years

- Developed and maintained production-grade applications across enterprise and product platforms.
- Built full-stack modules including dashboards, CMS features, APIs, authentication, and workflow automation.
- Implemented JWT-based authentication and role-based access control for secure multi-role systems.
- Integrated payment workflows, ERP connectors, file/document modules, and reporting systems.
- Focused on code quality, reusable architecture, responsive UI, and SEO/performance optimization.

Technical Skills

- **Frontend:** Next.js, React.js, TypeScript, Tailwind CSS, HTML5, CSS3
- **Backend:** Node.js, NestJS, Express.js, Laravel (PHP)
- **Database:** MongoDB, Mongoose, MySQL
- **Authentication & Security:** JWT, Role-Based Access Control
- **Tools & Integrations:** Git, REST APIs, Razorpay, Odoo ERP, AWS S3

Professional Projects

1. **GreenCo Rating Management Platform (Admin / Assessor / Company / Facilitator Panels)**

Role: Full Stack Developer

Platform Overview: Multi-panel enterprise platform for end-to-end GreenCo rating lifecycle management, from onboarding and document workflows to scoring and certificate issuance.

- Implemented role-based workflows for Admin, Assessor, Company, and Facilitator panels with stage ownership and milestone transitions.
- Built onboarding and project setup flows for Through CII and Through Facilitator routing with assignment and approval logic.
- Developed contract/work-order, primary data, and checklist document modules with upload, review, rejection, and re-upload handling.
- Implemented scoring lifecycle including preliminary scoring, criteria-level score handling, final scoring submission, and score-band visibility.
- Built comparison exports (Rating Comparison and Scoring Comparison) with filtered XLSX downloads and dynamic columns.
- Implemented finance pipelines including proforma invoices, payment submissions, admin acknowledgements, and status-driven transitions.
- Built certificate module with score aggregation, rating band mapping, certificate issuance, and validity date management.
- Added activity logs and notifications to ensure complete audit trail and operational tracking across all panels.

Tech Stack: Next.js, React.js, TypeScript, NestJS, Node.js, MongoDB, Tailwind CSS, JWT

2. Kind India Donation Platform (kindindia.in)

Role: Full Stack Developer

Platform Overview: Large-scale donation platform connecting donors, NGOs, and volunteers through Frontend, Admin Panel, and NGO Panel.

- Built production modules using **Next.js**, **React.js**, and **TypeScript** for scalable panel-based architecture.
- Developed backend services with **NestJS** and **Node.js**, including secure APIs, authorization layers, and operational modules.
- Designed **MongoDB** data structures and Mongoose models for campaigns, donations, users, payouts, and content.
- Built analytics dashboards and reports using chart-driven UI for real-time operational insights.
- Implemented NGO verification workflows, document validation (PAN, 80G, FCRA, DARPAN), and admin approval pipelines.
- Developed CMS modules for blogs, banners, FAQs, testimonials, and policy pages.
- Built finance and payout features including commission logic, transaction tracking, and status management.
- Improved mobile donation journeys, responsiveness, and SEO performance for higher usability and discoverability.

Tech Stack: Next.js, React.js, TypeScript, NestJS, Node.js, MongoDB, Mongoose, Tailwind CSS, JWT, REST APIs

3. Artist Web Application (Artist Portal)

Role: Frontend Developer

- Developed a web-based artist dashboard for managing albums and songs.
- Implemented credential-based login alignment with existing mobile platform and onboarding routing.
- Built upload and lifecycle modules for content status tracking, deletion, and management.
- Ensured compatibility with admin moderation and approval workflows.

Tech Stack: Next.js, TypeScript, REST APIs

4. Vaishnai Group Corporate Website (vaishnaigroup.com)

Role: Full Stack Developer

- Built dynamic multi-business corporate website modules with admin-managed content.
- Developed backend APIs in **NestJS** for authentication, content operations, and secure service handling.
- Implemented **MongoDB** schema-driven storage for content and media metadata.
- Integrated secure file uploads and notifications with AWS S3 support.

Tech Stack: Next.js, NestJS, MongoDB, Mongoose, JWT, AWS S3

5. KBS Corporate Website (leoion.com)

Role: Frontend Developer

- Developed responsive corporate website UI using reusable Next.js components.
- Implemented SEO-oriented pages, mobile-first layouts, and optimized rendering performance.
- Improved accessibility and cross-browser consistency for production deployment.

Tech Stack: Next.js, TypeScript, Tailwind CSS

6. MirakiTech Corporate Website (mirakitech.com)

Role: Full Stack Developer

- Designed and developed modern corporate website experience with responsive design patterns.
- Built backend services for contact and dynamic content flows.
- Applied SEO best practices and performance optimizations for production readiness.

Tech Stack: Next.js, Node.js, JavaScript, Tailwind CSS

Academic Projects

- **Hospital Management System:** Built with Java and Spring Boot for patient, doctor, and appointment workflows.
- **Online Book Store:** Developed product catalog, cart, and checkout modules for web-based commerce flow.

Achievements

- Delivered multiple production-ready applications across enterprise and startup environments within 1.5 years.
- Completed “Web Technologies” course certification.
